Teacher Interview

Curious about you, Teacher Rachel

1. 선생님, 자기 소개 부탁드립니다 :)

I haven't thought too much about myself, but I do find it challenging to look at myself directly.
I have an MBTI of INFP, which means I tend to be a bit of a shy introvert. However, I also have two sides to my personality, especially at work. While I'm in social settings, I can switch to a more outgoing and proactive role when it comes to work. I believe this duality helps me adapt to different situations.
If you have any questions about me, please don't hesitate to approach me first.

2. 현재 초등학생들에개 배우고 싶은 점은?

I admire their ability to be confident and carefree, without fear of judgment. I also envy the environment they are in, where they have the opportunity to experience and try many different things.
I want to learn how to build that kind of confidence and fearlessness, especially in front of the camera.^^ What I would like to learn is how to take natural poses and express genuine facial expressions in photos.

3. 영어 공부 팁을 학생들에게 알려준다면?

If you can't avoid it, enjoy English! I would suggest three key tips.
1. Consistency : Studying a little bit each day is more effective than cramming all at once.
2. Practice speaking : The more you speak, the more confident you'll become. Don't be afraid to make mistakes. It's part of the learning process!
3. Use fun resources : Watching cartoons, playing games, or listening to English music are great ways to improve listening and speaking skills in a fun way.

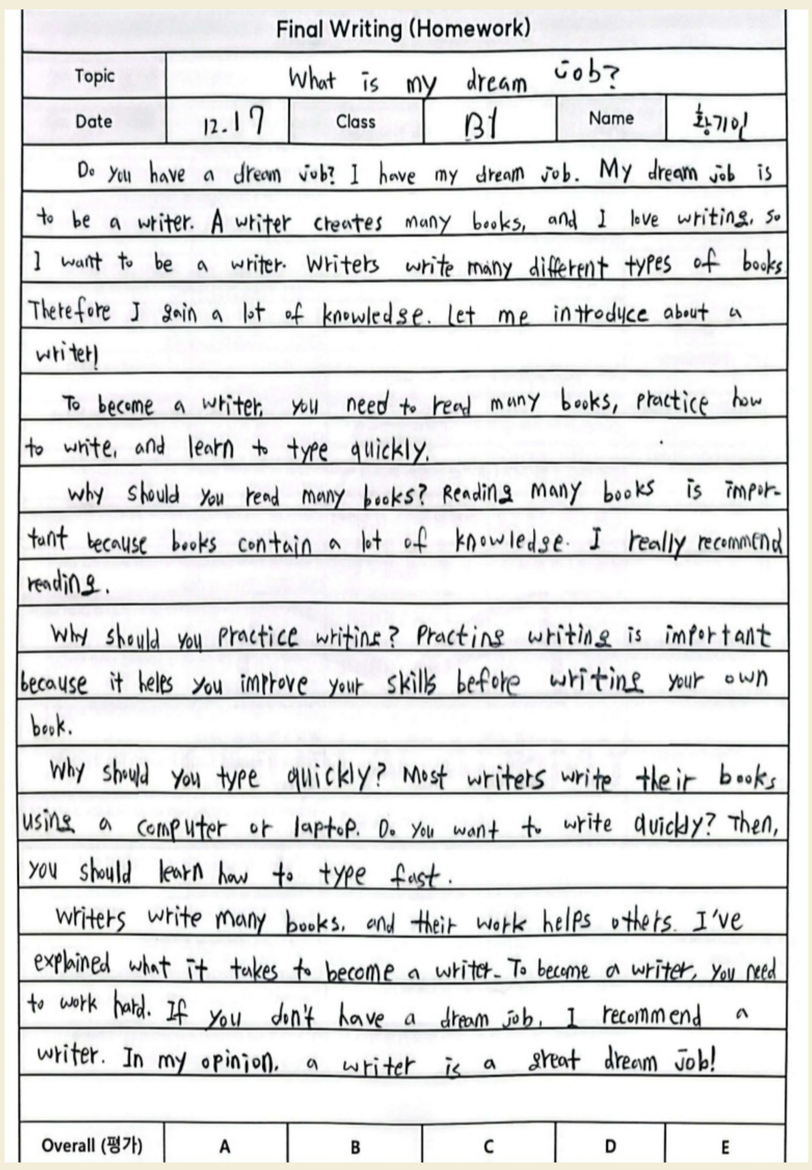

4. 나에 대한 칭찬을 한다면?

If I were to compliment myself, I would say that I am a dedicated and responsible person. I take to understand the needs of those around me and work hard them succeed. I am also open to learning and self-improvement, always looking for ways to grow both personally and professionally.

5. 내가 가장 중요하게 생각하는 모토는?

My most important motto is, 'Let's not stay in reality, let's keep challenging ourselves.' I believe that challenges, even if they are difficult, become valuable new experiences and growth. I see every challenge as an opportunity to gain insight and improve.

Topic	Introducing My Favorite Restaurant				
Date	12.18	Class	B3	Name	이수민B

If you could go to the restaurant of your choice, where would you go? You might think of various types of restaurants, such as Korean food, Western food, Chinese food or snacks. Among them, Outback, a Western-style restaurant, comes to my mind. This is because Outback holds many memories of eating out with my family. Apart from that, the reasons why I chose this restaurant are as follows:

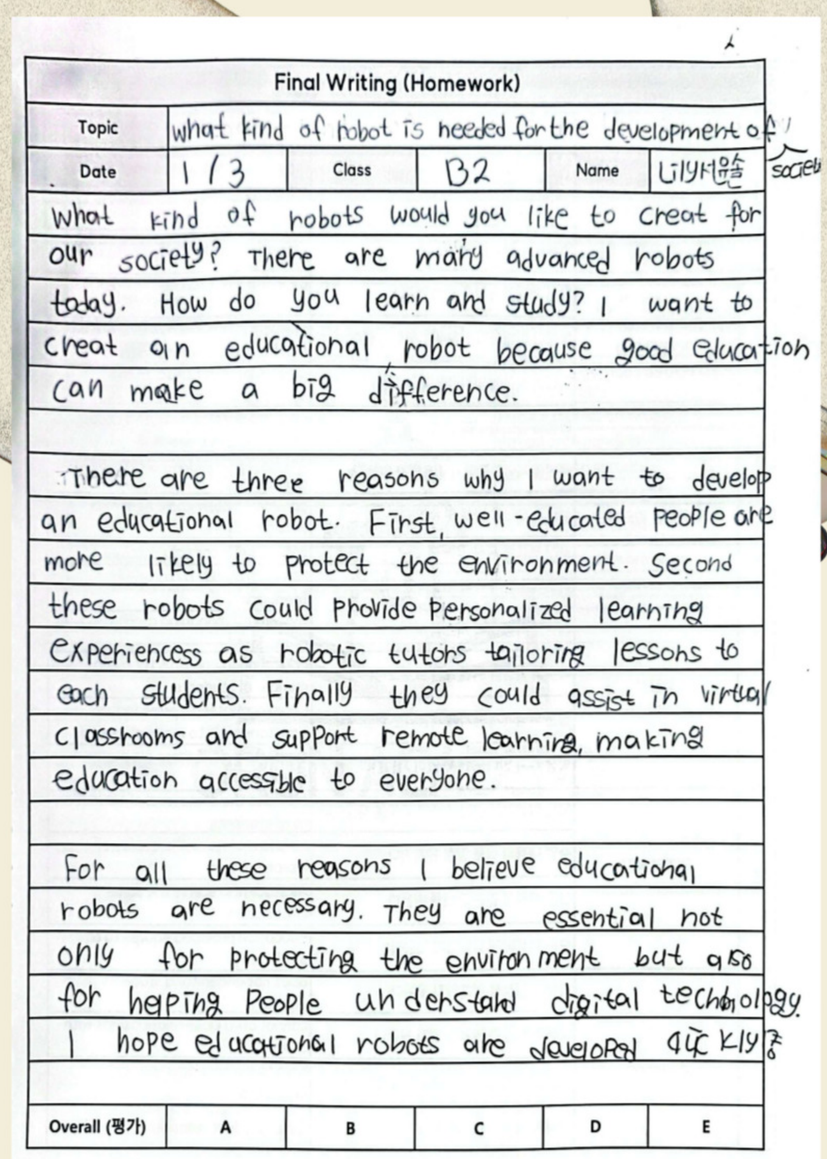

First, Outback has a great atmosphere, and the staff is friendly. These days, when you go to Outback, you can enjoy the Christmas atmosphere thanks to the Christmas decorations. Also, if you make a reservation in advance you can enter immediately without waiting.

Second, at Outback, you can eat a variety of foods, such as steak, rib-eye, pasta, soup, salad, and risotto. Among them, I like to eat steak, cream pasta, and mushroom soup. Also, dessert is included with lunch, witch is economical.

Like this, Outback has a good atmosphere, friendly service and a variety of delicious dishes. This is why my family often goes there. So, I recommend Outback for these reasons. If you have the chance, I hope you visit Outback!

Topic	what kind of robot is needed for the development of society				
Date	1/3	Class	B2	Name	Lily서윤솔

What kind of robots would you like to creat for our society? There are many advanced robots today. How do you learn and study? I want to creat an educational robot because good education can make a big difference.

There are three reasons why I want to develop an educational robot. First, well-educated people are more likely to protect the environment. Second these robots could provide personalized learning experiencess as robotic tutors tailoring lessons to each students. Finally they could assist in virtual classrooms and support remote learning, making education accessible to everyone.

For all these reasons I believe educational robots are necessary. They are essential not only for protecting the environment but also for helping People understand digital technology. I hope educational robots are developed 더욱 많이
